@UI.textArrangement

Application developers can define the arrangement of a code or ID value and its text using the `UI.TextArrangement` annotation.

TextArrangement	Display Format
TextFirst - (default value)	ABC (A1)
TextLast	A1 (ABC)
TextOnly	ABC
TextSeparate	A1

```
key ILMPolicyCategory,  
key ILMPolicyType,  
  @Consumption.valueHelpDefinition: [{ en  
  @ObjectModel.text.element: ['language_n  
  @UI.textArrangement: #TEXT_ONLY  
key Language,  
_language_t.language_name as language_name
```
